Arrangement on Weekly Cleansing Programme for Public Heated Swimming Pools

With effect from November this year to March 2005, the weekly cleansing programme for public heated swimming pools managed by LCSD will start from 10:00 a.m. till the end of the second session. Details are enlisted at the Annex. In working out the programme, considerations have been given to the fact that only 13 public heated pools are opened during the period and that the usage of the pools during the time of pool cleansing is relatively low. Furthermore, it can cater for the genuine need of swimmers in the early morning and training classes organized by the swimming organizations in the evening and at night.
